Packers and Stockyards Statistical Report

2004 Reporting Year

ABSTRACT

The 2004 Packers and Stockyards Statistical Report on livestock marketing and meat packing contains data on industry concentration, plant size, volume of packer feeding, packer financial performance, number of animals purchased by source of supply (public market versus direct purchase), and method of procurement (live versus carcass basis). Most of the data are reported by type of animal, State, or geographic region.

PACKERS AND STOCKYARDS STATISTICAL REPORT 2004 REPORTING YEAR

Prepared by:

Industry Analysis Division Staff Grain Inspection, Packers and Stockyards Administration U.S. Department of Agriculture

INTRODUCTION

Reporting Firms

This report contains data on (1) slaughtering packers; (2) market agencies buying or selling livestock on commission, including auction markets and all other selling agencies; and (3) livestock dealers buying and selling livestock for their own accounts. It includes data for firms' 2004 reporting year. Part III of the report includes data on all entities registered with the Grain Inspection, Packers and Stockyards Administration.

All slaughtering packers operating in commerce in the United States have been subject to the Packers and Stockyards Act since its passage in 1921. Section 201.97 of Chapter 9 of the Code of Federal Regulations requires every packer, live poultry dealer, stockyard owner, market agency, and dealer, unless exempt, to file a report annually with the U.S. Department of Agriculture's (USDA) Grain Inspection, Packers and Stockyards Administration (GIPSA). Prior to reporting year 1977, packers slaughtering less than 1,000 head of cattle or less than 2,000 head of all classes of livestock annually were exempted from the reporting requirements. Beginning with reporting year 1977, packers that operate

in interstate commerce and purchase \$500,000 or more of livestock on an annual basis are required to file an annual report with GIPSA. Since both slaughter volume and the value of purchases vary from year to year, certain small slaughtering packers are required to file an annual report in some years but not in others. Packers beginning operation late in their fiscal years are not required to file annual reports for a partial year. Also, packers that have gone out of business are not required to file annual reports.

A number of firms that primarily slaughter livestock for others (custom slaughterers) are not required to file annual reports with GIPSA and their data are not included in this report. In 2004, 234 firms operating 322 plants reported to GIPSA (see table 1). In comparison, on January 1, 2004, there were 855 federally inspected plants and 2,239 non-federally inspected plants (see table 2). Many of these plants operated solely or primarily as custom slaughterers and were not required to file reports with GIPSA because the firms did not purchase more than \$500,000 worth of livestock annually.

The following table compares the number of plants operated by firms reporting to GIPSA in 2004 with all federally inspected (F.I.) plants slaughtering livestock by type of livestock and number of head. The size of plants of firms reporting to GIPSA is based on livestock procured for slaughter by the firm and does not count livestock the plants custom-slaughter for others. The size of F.I. plants includes all livestock slaughtered regardless of who owned the livestock.

Number of plants operated by firms reporting to GIPSA and number of federally inspected (F.I.) plants, 2004

	GIP	<u>SA</u>	Federally is	<u>nspected</u>
Type of livestock	Less than 1,000 head	All plants	Less than 1,000 head	All plants
Cattle	36	173	511	689
Calves	31	59	202	234
Hogs	18	166	418	664
Sheep/lambs	24	56	421	500

Packers reporting to GIPSA accounted for the following percentages of U.S. commercial slaughter¹ in 2004:

<u>cent</u>
9.6
7.3
9.2
4.1
5.3
5.8

The percentages of commercial slaughter in the table above for cattle are higher than reported in most recent years. Commercial cattle slaughter, and especially steer and heifer slaughter, began to fall in calendar-year 2003 and continued in 2004. Calendar-year commercial slaughter is used in calculating the percentages above. Information in packer annual reports cover the packers' reporting years (see next section), which may include part of the

¹ Commercial slaughter includes slaughter conducted at both federally and State-inspected facilities.

previous calendar year when slaughter was higher, and this caused higher coverage percentages for 2003 and 2004.

Calendar Year/Reporting Year

A majority of meat packers use the calendar year as their fiscal, or operating, year for accounting and reporting purposes. Many packers, however, use fiscal years that end in months other than December. GIPSA includes the data supplied by these packers in the year in which each packer's fiscal year ends. Thus, for example, data from a packer whose fiscal year ends May 31, 2004 is included in this statistical report and includes information from June 1, 2003 until May 31, 2004.

Type of Outlet

Prior to 1988, GIPSA reported statistics separately for terminal markets, where several firms sell livestock on commission, and for auctions, where a single firm sells livestock on commission. Beginning in 1988, GIPSA combined livestock volumes sold through terminals and auctions, and reported those sales as "public markets" sales due to few terminal markets and the small numbers of livestock traded at terminal markets.

Consolidated Reports of Firms

Packing firms may elect to file consolidated reports for all of their slaughter operations or may file separate reports for each of their operating units. Since 1980, annual reports filed by separately filing operating units of a firm have been combined by GIPSA when reporting firm-level data, such as concentration ratios.

HIGHLIGHTS OF THIS REPORT

Concentration of Meatpacking Firms

This report contains two series of concentration ratios² for steers and heifers, cows and bulls, cattle, hogs, and sheep and lambs. The first is based on procurement data reported to GIPSA by packers, and includes all livestock procured for slaughter by each firm, including livestock custom-slaughtered for reporting packers by other firms and livestock slaughtered in State-inspected plants. The data are reported by firms for their fiscal years. The second concentration series is based on slaughter data collected by USDA's Food Safety and Inspection Service (FSIS) from federally inspected plants. These data are for the calendar year. FSIS reports the number of animals slaughtered at each plant regardless of who owns the animals. GIPSA adjusts these data to reflect ownership of the animals at the time of slaughter based on information provided by reporting packers. Both series use total commercial slaughter for the calendar year as the denominator for calculating concentration ratios. Unless otherwise indicated, the discussion that follows is based on concentration ratios calculated using the adjusted FSIS data.

The four-firm concentration ratio for steer and heifer slaughter has been relatively stable since the mid–1990s. The ratio based on FSIS slaughter data remained at 80 percent in 2004. The four-firm concentration ratio based on annual reports filed with GIPSA increased in 2003 to 83 percent, an all-time high value, but fell 2 percentage points in 2004 to 81 percent. Steer and heifer slaughter has the highest four-firm concentration ratio in

² A concentration ratio is defined as the percentage of total activity (e.g., slaughter, livestock purchases) accounted for by the largest firms, usually the four largest firms.

the red meatpacking industry. A broader measure of concentration, the Herfindahl–Hirschman Index³ (HHI), decreased from 1,900 in 2003 to 1,791 in 2004 (see table 27).

Four-firm concentration in cow and bull slaughter increased from 24 percent in 1992 to 32 percent in 2000, and increased to 44 percent in 2003 (see table 28). It fell 1 percentage point in 2004 to 43 percent. The HHI fell from 651 in 2003 to 632 in 2004.

Four-firm concentration in cattle slaughter remained steady in 2004 at 69 percent (see table 29). The HHI decreased from 1,404 in 2003 to 1,366 in 2004.

Four-firm concentration in hog slaughter remained relatively stable around 56 percent from the mid-1990s until 2003. The ratio increased to 64 percent in 2003 in part due to Smithfield's acquisition of Farmland (see table 31). The ratio remained at 64 percent in 2004. The HHI fell from 1,334 in 2003 to 1,320 in 2004.

Four-firm concentration in sheep and lamb slaughter averaged between 65 percent and 73 percent from 1992 until 2003. In 2004, the ratio was 65 percent (see table 32). Based on the information reported to GIPSA, the HHI rose to 1,341 in 2004.

Overall concentration in the red meatpacking industry was relatively stable at about 62 to 63 percent between 1993 and 1998, and then increased to 66 percent in 2000 and reached an all-time

³ The HHI is defined as the sum over all firms of each firm's squared percentage of market share. The Department of Justice and the Federal Trade Commission consider markets to be unconcentrated when the value of the HHI is below 1,000, moderately concentrated when HHI is between 1,000 and 1,800, and highly concentrated when HHI is above 1,800. (U.S. Department of Justice and the Federal Trade Commission, Horizontal Merger Guidelines, issued April 2, 1992, revised April 8, 1997).

high value of 69 percent in 2003 (see table 34). The ratio fell to 67 percent in 2004. The HHI was 1,341 in 2004.

Number and Size of Plants

The total number of packing plants operated by firms reporting to GIPSA rose in 2004 for the first time in several years, from 308 in 2003 to 322 in 2004, about the same number as 2002 (see table 1). The number of plants slaughtering cattle rose by about 5 percent and hogs 8 percent. The number of plants slaughtering calves fell by about 6 percent. The number of plants slaughtering sheep and lambs remained about the same (see table 3).

While the overall number of packing plants operated by reporting packers has fallen over the years, the number of slaughter plants in the largest size categories has remained relatively steady (see tables 18 through 24).

Specialization of Packers

The total number of reporting meatpacking firms dropped from 810 in 1980 to 224 in 2003, but rose to 234 in 2004. Table 25 shows that most of the decline occurred among firms that slaughter two or more types of livestock. Since the mid–1990s, the majority of packers purchasing more than \$5 million worth of slaughter livestock has specialized in only one type of livestock. Table 26 shows the trend in percentage terms. The proportion of packers slaughtering only one type of livestock has risen steadily from about 18 percent in 1980 to 53 percent in 2002. Since then it has remained steady.

Use of Public and Nonpublic Marketing Channels

Packer purchases at public markets include purchases at auction and terminal markets at public stockyards, and video auctions. Purchases through nonpublic marketing channels include direct purchases by packers at their plants, packer-owned buying stations, feedyards, and from dealers.

The proportion of most types of livestock bought by packers in public markets declined for all livestock types in 2004 (see table 5). Calves have traditionally been the type of livestock where public-market purchases are most likely, but the proportion of calves bought by packers in public markets declined by almost half, from 20 percent to 12 percent. This matches the proportion of cattle purchased in public markets in 2004. Hog packers' use of public markets declined slightly in 2003, to less than 2 percent of their total hog purchases.

The proportion of slaughter cattle purchased in public markets has been relatively stable at 13 percent to 14 percent since the mid-1990s, but declined to 12 percent in 2004. In 2004, more than 75 percent of cattle purchased at public markets were cows and bulls. Packers purchased about 54 percent of their slaughter cows and bulls through public marketing channels, but only about 3 percent of slaughter steers and heifers were purchased through public markets (see tables 8 and 9).

Packers used public markets much more frequently to purchase steers and heifers in the South Atlantic region than in other regions (see table 8). Packers used public markets to purchase the majority of their slaughter cows and bulls in every region except the Southern Plains and East North Central regions (see table 9).

Hog slaughterers showed much less regional variation in their use of public markets (see table 12). In 2004, packers in most regions purchased less than 2 percent of their hogs in public markets. Packers in the North Atlantic region procured about 12 percent of their hogs through public markets, and packers in the South Central region procured about 8 percent of their hogs through public markets.

Smaller packers continued to rely more on public markets for their slaughter needs than larger packers (see table 6). The four largest hog packers procured the smallest proportion of their slaughter needs in public markets compared with other packers, and the proportion grew as packer size decreased. Overall, the top eight packers procured a smaller percentage of cattle in public markets than the top four packers. In 2004, the 20 largest packers procured 10 percent of their cattle and less than 1 percent of their hogs through public markets. In contrast, packers smaller than the top 20 procured 35 percent of their slaughter cattle and 7 percent of their hogs through public markets.

Carcass-Basis Procurement

The proportion of slaughter livestock purchased on a carcass basis (such as grade, weight, yield, guaranteed yield, or percentage lean) in 2004 ranged from 39 percent for cows and bulls to 77 percent for hogs (see table 14). The percentage of cattle purchased on a carcass basis continued to fall from 2002's all-time high of 63 percent, reaching 53 percent in 2004 (see table 15). About 50 percent of all slaughter calves bought in 2004 were procured on a carcass basis, an increase of 9 percentage points. The proportion of hogs purchased on a carcass basis remained at 77 percent in 2004, and was the highest among all types of slaughter livestock. The percentage of sheep and lambs pur-

chased on a carcass basis fell from 70 percent in 2001 to 46 percent in 2004.

The 20 largest packers, based on total amount spent for all live-stock slaughtered, purchased a larger percentage of cattle and hogs on a carcass basis than did other packers (see table 15). In 2004 the 20 largest packers purchased 85 percent of their hogs and 54 percent of their cattle on a carcass basis, compared to other packers who purchased 30 percent of their hogs and 48 percent of their cattle on a carcass basis.

Packer Feeding, Forward Contracts, and Marketing Agreements

GIPSA defines committed procurement⁴ as livestock that are owned or fed by a packer more than 14 days prior to slaughter, livestock that are procured by a packer through a forward contract or marketing agreement that has been in place for more than 14 days, or livestock that are otherwise committed to a packer more than 14 days prior to slaughter. This definition includes animals procured through forward contracts, marketing agreements, and packer feeding arrangements.

Overall, in 2004, the use of all forms of committed procurement by the top four steer and heifer packers fell for the second year in a row by about 3 percentage points to 35 percent of their total steer and heifer procurement.⁵ The top four steer and heifer

⁴ Committed procurement was previously referred to as captive supply.

⁵ GIPSA has audited the top four firms' committed procurement filings for steers and heifers from 1999 to 2003. Table 16 contains statistics calculated from audited data for the top four firms from 1999 to 2003 along with statistics from unaudited data reported by the top 15 packers for 1988–98. Table 17 shows monthly variation in use of committed procurement by the four leading steer and heifer packers.

packers' use of marketing agreements rose from 21 percent in 1999 to about 32 percent of their total steer and heifer procurement in 2002, but fell to 23 percent in 2004 (see table 16). The top four steer and heifer packers' use of forward contracts was virtually unchanged at 4.2 percent in 2004. Packer feeding of steers and heifers by the top four firms fell from about 10 percent in 2003 to 8 percent in 2004.

Packer Financial Performance

Tables 35 through 39 present financial ratios for several groupings of the 40 largest meatpacking firms. Firms are ranked by total amount spent for all livestock slaughtered. All firms included in these tables slaughter livestock. Some of the firms also further process carcasses, and some have large non-red meat operations. A few firms file consolidated financial statements in which their meatpacking and processing operations are combined with their other operations. Thus, the financial statistics calculated from packers' reports may include the financial performance of non-meat operations of some firms.

Profitability (measured by operating income as a percentage of sales) of the 40 largest meat packers has fluctuated widely since 1992 (see table 39). In 1992 and 1993, profitability of the top 40 firms was 1.2 percent of sales. Profitability rose to 2.9 percent of sales in 1994 and 3.7 percent in 1995. Profitability has ranged between 1.5 percent and 2.8 percent since then. Profitability of the top 40 firms was 1.7 percent in 2004.

Throughout the 1992–2000 period, the 20 largest packers reported higher operating income as a percentage of sales than packers ranked 21 through 40. In 2001 and 2002, smaller packers reported greater operating income as a percentage of sales than larger packers, but in 2003 and 2004, larger packers again

reported greater income as a percentage of sales. Throughout the 1992–2004 period, firms ranked 9 through 20 reported larger operating profit margins than the top 4 or top 8 packers.

The top four firms generally reported operating on smaller gross margins (calculated as gross income divided by sales) than smaller firms (see tables 35 and 37). Between 1993 and 2001, the top four firms reported gross margins that were 11 to 20 percentage points below firms ranked 5 through 8 (see table 37). In 2002, gross margins for all groups ranged between 21 percent and 25 percent. In 2004 firms in all groups except those ranked 5 through 8 and 9 through 20 reported gross margins between 20 percent and 24 percent. Firms ranked 5 through 8 reported average gross margins of 30 percent and firms ranked 9 through 20 reported average gross margins of 35 percent.

The top four packers' operating expense ratios were also lower than other firms (see tables 35 and 38). The top four firms reported higher net sales per dollar of assets than any other groups in 2004 (see table 36).

Auction and Terminal Market Sales

Firms selling on commission market feeder livestock as well as livestock sold for slaughter. The number of cattle and calves marketed through firms selling on commission was 38 million in 2004, down marginally from 2003. The number has fluctuated between 38 million and 42 million since 1996 (see table 42). The volume of hogs marketed through firms selling on commission has followed a downward trend in recent years, but rose to 7.3 million head in 2003 and 2004 from 6.5 million in 2002. The number of sheep and lambs marketed through firms selling on commission increased to 3.6 million head in 2004, slightly above the 3.4 million marketed in 2003.

<u>Livestock Purchases by Dealers and Firms Buying on</u> Commission

Purchases by dealers⁶ and firms buying on commission include both feeder livestock and livestock destined for slaughter. Purchases of cattle and calves by dealers and firms buying on commission dropped to 32.1 million head in 2004 (see table 42). Purchases of hogs by dealers and order buyers rose in 2004 to 20.4 million head, the largest total since 1999. The number of sheep and lambs purchased by dealers and order buyers in 2004 fell to 2.3 million head, the smallest total in recent years.

MERGERS AND ACQUISITIONS IN MEAT PACKING

Numerous mergers and acquisitions have occurred in meat packing during the past several years, but the rate slowed in 2004. The following list includes all mergers and acquisitions in 2004 and 2005 involving at least one firm that is required to file an annual report with GIPSA.

Meat Packer Mergers and Acquisitions, 2004 and 2005 (Listed by alphabetical order of acquiring company)

2004

Acquiring company: Hormel Foods Corp., Austin, MN. Company acquired: Clougherty Packing Co., Los Angeles,

CA.

2004, continued

Acquiring company: Smithfield Foods, Inc., Smithfield, VA. Company acquired: Dixie Packers (from Winn-Dixie Stores),

Madison County, FL.

Acquiring company: Smithfield Foods, Inc., Smithfield, VA. Company Acquired: MF Cattle Feeding Inc. from ConAgra

Foods Inc., Omaha, NE.

2005

Acquiring Company: Cargill Meat Solutions, Wichita, KS.

Company Acquired: Beef Packers, Inc., Fresno, CA.

Acquiring Company: American Foods Group, Inc.,

Alexandria, MN.

Company Acquired: Rosen Meat Group, Fairmont, MN.

Acquiring Company: Strauss Veal & Lamb, Franklin, WI. Company Acquired: Swissland Packing Co., Ashkum, IL.

Acquiring Company: Seaboard Farms, Shawnee Mission, KS.

Company Acquired: Daily's, Missoula, MT.

Acquiring Company: Sun Capital Partners, Boca Raton, FL.

Company Acquired: Creekstone Farms Premium Beef,

Arkansas City, KS.

⁶ Dealers buy and sell for their own account.

¹ Includes plants custom slaughtering for reporting slaughtering packers.

² Does not include custom-slaughter plants that are used by reporting packers.
³ Includes purchases of livestock from all sources except terminal and auction markets.

⁴ Includes purchases from terminal and auction markets. Terminal markets use more than one market agency to sell livestock on commission; auctions markets use only one. A market agency is defined as any person engaged in the business of (a) buying or selling in commerce livestock on a commission basis or (b) furnishing stockyard services.

⁵ Cattle includes steers, heifers, cows, and bulls.

Total	134,220	138,016	139,872	97.3	96.0	322	855	2,239	

NA denotes data not available.

Source: U.S. Department of Agriculture, <u>Livestock Slaughter</u>, <u>2004 Summary</u>, National Agricultural Statistics Service, MTAN1-2-1; and annual reports filed with GIPSA for reporting year 2004 by packers purchasing more than \$500,000 of livestock annually.

¹ Number of plants reporting to GIPSA for the 2004 reporting year, and number of federally inspected and non-federally inspected plants on January 1, 2004.

² Based on fiscal year totals of firms purchasing more than \$500,000 of livestock. Firms going out of business during reporting year and firms operating only a few months during reporting year often do not purchase more than \$500,000 of livestock and are not required to report.

³ Commercial slaughter of steers, heifers, cows, and bulls was estimated by assuming the same proportion of total cattle as for federally inspected slaughter.

⁴ In 2004, slaughter of steers and heifers fell from 2003 levels. Slaughter totals of firms that report to GIPSA on a fiscal-year basis other than the calendar year included some slaughter from the 2003 calendar year causing GIPSA totals to exceed federally inspected totals for

other than the calendar year included some slaughter from the 2003 calendar year, causing GIPSA totals to exceed federally inspected totals for these categories.

⁵ Cattle includes steers, heifers, cows, and bulls.

¹ Includes steers, heifers, cows, and bulls.
² Includes terminal and auction markets. Terminal markets use more than one market agency to sell livestock on commission; auctions use only one. A market agency is defined as any person engaged in the business of (a) buying or selling in commerce livestock on a commission basis or (b) furnishing stockyard services.

³ Includes purchases of livestock from all sources except from terminal and auction markets.

⁴ Numbers may not sum to total due to rounding.

⁽D) Entry was withheld to avoid disclosing data for individual companies.

¹ Based on total spent for all livestock slaughtered.

² Public markets include terminal and auction markets; nonpublic markets include all other sources of livestock.

Includes steers, heifers, cows, and bulls.
 None of the 20 largest packers slaughtered calves.
 Numbers may not sum to total due to rounding.

⁽D) Entry was withheld to avoid disclosing data of individual companies.

¹ Carcass-basis purchases refer to livestock purchased on the basis of carcass grade, weight, yield, guaranteed yield, lean percent, or combinations thereof.

² Includes steers, heifers, cows, and bulls.

³ Based on total amount spent for all types of livestock slaughtered.

Table 16.—Packer feeding, forward contracts, and marketing agreements as a percentage of steer and heifer slaughter by firm size for selected years 1988–2004

1997	3.7	14	4.9	18.6
1998	3.7	1′	7.7	21.4

¹ "Other" includes steers and heifers purchased more than 14 days in advance of slaughter and not listed as packer fed, forward contracts, or marketing agreements.

² Data for forward contracts and marketing agreements are combined in 1988–98.

³ Percentages for years before 1999 were based on unaudited data reported by packers to GIPSA.

⁴ Data for 1999 to 2004 were audited by GIPSA, and are not comparable to prior years.

⁽GIPSA-SR-06-1)

⁽C) Prior to 1991, the category was combined with plants slaughtering 500,000 head or more.(D) Entry was withheld to avoid disclosing data of individual companies. Data are included in the next smaller class.

¹ Includes plants slaughtering less than 25,000 head.

¹ Conc. equals concentration, which is the percentage of total commercial slaughter accounted for by the firms included in the stated size group.

² Share equals percentage of total commercial slaughter.

³ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total commercial slaughter.

⁴ Comm. sltr. equals total commercial slaughter of fed and non-fed steers and heifers during the calendar year.

⁵ Numerator values are number of head procured for slaughter during each firm's reporting (fiscal) year.

⁶ Numerator values are number of head slaughtered in calendar year. Number of plants may differ from data reported to GIPSA due to timing of plant openings and closings.

¹ Conc. equals concentration, which is the percentage of total commercial slaughter accounted for by the firms included in the stated size group.

² Share equals percentage of total commercial slaughter.

³ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total commercial slaughter.

⁴ Comm. sltr. equals total commercial slaughter of cattle during the calendar year.

⁵ Numerator values are number of head procured for slaughter during each firm's reporting (fiscal) year.

⁶ Numerator values are number of head slaughtered in calendar year. Number of plants may differ from data reported to GIPSA due to timing of plant openings and closings.

NA denotes data not applicable because there were fewer than 50 firms. Mil. denotes millions.

¹ May include processing plants that do not slaughter.

² Conc. equals concentration, which is the percentage of total boxed beef production accounted for by the firms included in the stated size group. Numerator values are GIPSA data for firms' reporting years.

³ Share equals percentage of total U.S. boxed beef production. Numerator values are for firms' reporting years.

⁴ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total U.S. boxed beef production.

⁵ Includes all U.S. production during the calendar year by slaughtering and nonslaughtering fabricators, but not retail stores.

¹ Based on total amount spent for all livestock slaughtered.

Source: <u>Livestock Slaughter, Annual Summary</u>, National Agricultural Statistics Service, USDA, MTAN 1-2-1, various issues; U.S. Department of Agricultural <u>Agricultural Prices</u>, National Agricultural Statistics Service, various issues; and packer annual reports filed with GIPSA. (GIPSA-SR-06-1)

² May include processing plants that do not slaughter.

³ Purc. equals livestock purchases.

⁴ Conc. equals concentration, which is the percentage of total commercial slaughter livestock value accounted for by the firms included in the stated size group.

⁵ Share equals percentage of total U.S. livestock purchases. Numerator values are for firms' reporting years.

⁶ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total livestock purchases.

⁷ Total value of all livestock purchased for slaughter by reporting packers during their reporting years, plus the value of livestock slaughtered by nonreporting packers during the calendar year, based on reported average prices and weights.

Table 35.—Sales, expenses, and operating income of 4, 8, 20, and 40 largest¹ meatpacking firms for 2004

⁽D) Entry was withheld to avoid disclosing data of individual companies.

¹ Includes all auctions, terminal markets, video auctions, and country commission firms. A country commission firm is a market agency selling on commission that does not operate an auction or terminal market.

² Location of public markets. Livestock sold through a market in one State or region may move to other States or regions for further feeding, breeding, or slaughter.

³ Cattle includes steers, heifers, cows, and bulls.

⁴ Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Dealers purchase livestock for resale on their own accounts.
 Location of business addresses of dealers and firms buying on commission. Total volume is allocated to business location of firm even though firms can operate in more than one State.

May include other species.
 Cattle includes steers, heifers, cows, and bulls.
 Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Table 42.—Volume and value of marketed livestock for firms selling on commission¹ and for dealers² and firms buying on commission by livestock class for 1997–2004

¹ Packers, dealers, market agencies, and packer buyers are required to be bonded based on the value of their livestock purchases. The number of bonded packers includes some subsidiaries or other separate operating units of packers and packers buying less than \$500 thousand of livestock, so the number of bonded packers in this table is larger than the number of firms reported elsewhere in this report.

² Includes terminal and auction markets located at stockyards. Excludes video and electronic auctions that are not operated at stockyards.

³ SOC are market agencies selling on commission; BOC are market agencies buying on commission. A market agency is any person engaged in the business of (1) buying or selling livestock in commerce on a commission basis or (2) furnishing stockyard services.

⁴ Includes firms that provide clearing services, which provide bond coverage for dealers and market agencies buying on commission.

⁵ Individual buyers employed by bonded packers; they are required to be registered with GIPSA.

¹ Beginning in 1998, includes registrants operating in Canada.

² SOC are market agencies selling on commission; BOC are market agencies buying on commission. A market agency is defined as any person engaged in the business of (1) buying or selling in commerce livestock on a commission basis or (2) furnishing stockyard services.

³ Includes firms that provide clearing services, which provide bond coverage for some dealers and market agencies buying on commission.

⁴ Individual buyers employed by bonded packers; they are required to be registered with GIPSA.

⁵ Packers, dealers, market agencies, and packer buyers are required to be bonded based on the volume of their livestock purchases. The number of bonded packers includes some subsidiaries or other separate operating units of packers and packers buying less than \$500 thousand of livestock, so the number of bonded packers in this table is larger than the number of firms reported elsewhere in this report.

⁶ Includes terminal and auction markets located at stockyards. Excludes video/electronic auctions that are not operated at a stockyard.

⁷ Cover selling-on-commission transactions.

⁸ Cover buying-on-commission and dealer transactions.

⁹ Cover buying-on-commission and dealer transactions and clearing-services (bond coverage for another's livestock purchases).

¹⁰ Cover packer livestock purchase transactions.
